Tile images used in this brochure are based on *riichi-mahjong-tiles* (<https://github.com/FluffyStuff/riichi-mahjong-tiles>), published under CC BY 4.0.

Melds and declarations

CHII – stealing a tile for a sequence.
(Only from a player on the left side)

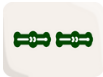

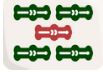

PON – stealing a tile for a set of three from any player.

KAN – stealing a tile for a set of four from any player **or** declaring a closed set of four **or** upgrading an open set of three.

RIICHI – declaring riichi (closed hand waiting for the last tile) - see reverse.

TSUMO – winning by drawing a tile from the wall yourself.

RON – winning on a tile discarded by another player.

Bamboos	Circles	Char-acters	Honours
		一萬 1	東 East
		二萬 2	南 South
		三萬 3	西 West
		四萬 4	北 North
		五萬 5	
		六萬 6	White
		七萬 7	
		八萬 8	Green
		九萬 9	Red

ABOUT US

Krakow Chombo Club is an association based in Krakow. Our main goals are to teach and promote Japanese (riichi) mahjong, as well as:

- teaching beginners and developing skills of advanced players,
- organising and collaborating on cultural events and mahjong tournaments,
- cooperating with other organisations with similar goals.

The group was founded in 2019 by students of the Jagiellonian University, and since then it has been actively growing.

RIICHI MAHJONG

Riichi mahjong is a four-player game that requires a mix of skill and luck, somewhat similar to games like poker or rummy.

It's played using a special set of 136 tiles, and the player's goal is to form a hand consisting of 14 of them.

Relatively complex rules, a large number of combinations (yaku), and the element of chance make each game unique, and difficult to predict.

BASIC YAKU

Fanpai – triplet of dragons or seat/round wind. 1 han.

Tanyao – numbered tiles from 2 to 8 only. 1 han.

Toitoi – open hand with only sets of three and a pair. 2 han.

Honitsu – exclusively honours and numbered tiles of one suit. 2 han open, 3 han closed.

Sanshoku doujun – the same sequence repeated in three different suits. 1 han open, 2 han closed.

Ikkituukan/ittsuu – sequences 123, 456, 789 in one suit. 1 han open, 2 han closed.

Chitoitsu – seven pairs. Making melds or having a repeated pair (four of the same tile) is not allowed. 2 han.

Riichi – possible if holding a ready, closed hand. The player places 1000 points on the table and, from that point on, cannot discard any tile other than the drawn one. 1 han.

Ippatsu – winning no later than the next draw after declaring riichi. No melds could have been made in the meantime. 1 han.

Pinfu – if the hand is closed, consists of only sequences, the pair is not of dragons, the seat wind, or the round wind, and the player had a two-sided wait for a sequence. 1 han.

Menzen tsumo – winning by tsumo with a closed hand (no melds). 1 han.
